

*"I worry that all our project interactions with stakeholders are fragmented making the process inefficient and fraught with risks. **Senior Manager – IP Cell***

There is a better way to do it

Each competitive analysis project should be streamlined and help build a comprehensive organizational knowledge base.

Take control with Curatus >

Competitive intelligence – Build, Preserve, Democratize

- Streamline access, review and collaboration of all curated content
- Make the expert commentaries available to all analysts and decision makers
- Preserve this knowledge base

CURATUS

At the core of CURATUS is an Active Centralized Repository designed to Organize and Enrich Curated set of Patents, Non-Patent Literature and Market Updates

It enables seamless and effective review and analysis of the curated content across multiple teams without the loss of context and history.

Key features

Active Enrichment of Patents

Upload curated patents and keep them refreshed from patent aggregators such as Espacenet

Role Based Access

Better management and control of the workflows with differentiated user access (e.g. IP Analysts vs. Attorneys & Technologists)

Market Insights

Augment the Technology & Competitor Insights from Patents, with curated News feeds and updates

BigInfo Labs is an Innovation Intelligence Company. We bring you the capabilities to address the critical gaps in your Innovation Lifecycle. For details go to <https://www.biginfo labs.com>

“Arranging periodic review of state of technology or competitive intelligence with stakeholders, manually keeping track of interactions and being able to pull insights from past projects is time consuming and laborious” - IP Analyst – IP Cell

Does this sound like you?

Collaborative reviews & decision making, especially with teams and stakeholders with different priorities and that too in a global workplace can be a daunting task.
